NOTICES.

- Both parties to a concern receive complete copies of all filings, attachments, and marginalia, which historically resolves most concerns before Part II.
- Filing an AM-3 does not affect your amalgam's cohesion metrics. They were affected by the concern. The form only tells us where to look, and we were already looking.
- The Union does not take sides in a cohesion concern. The Union has one side, and both of you are on it.
- Item 10f (humming) requires no description. Panopticon maintains the recordings. Personnel wishing to identify the tune should not; the tune is under review.
- Reciprocal filings (an AM-3 filed by the subject regarding the concerned member within 10 business days) are consolidated into a single file, and the amalgam is scheduled for an offsite. Attendance at the offsite is mandatory. The offsite has no scheduled end date; it ends when it has worked.
- The Union thanks you for caring about your amalgam. Caring at standard volume is the foundation of cohesion.
